

## Shower #6

Advocate was brought in as a subcontractor on this job to install this steam shower tile work and niche, a 20x20 inch floor in the primary suite bathroom and install a Brazilian Koa Floor in the primary suite bedroom. The shower install was done over a Kohler porcelain coated shower pan that needed specific under-access for the steam system.

Both the contractor and the client have provided favorable references for Advocate Insurance Restoration and Remodeling, LLC on this website, and the client needed us other times for restoration work, the contractor did also for about two dozen insurance restoration jobs in the southern New England region.
