

TUB SURROUNDS

An artistic tub surround can thoroughly change a boring outdated bathroom in a hurry.

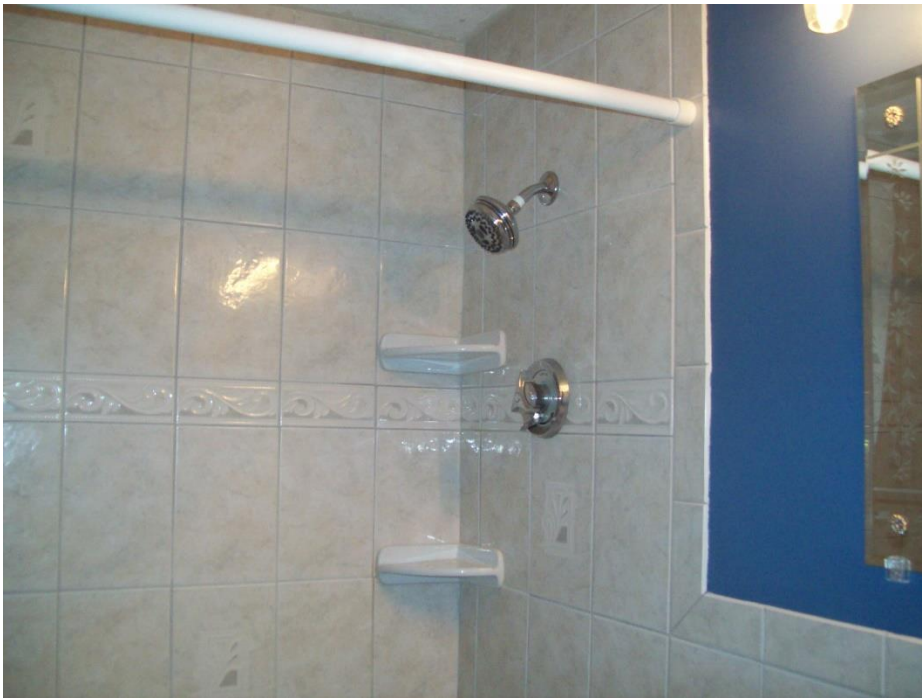

Dado cut border tiles with mitered corner cuts and a double accent stripe divided by a pencil molding. We then completed the job with wide high grade resin moldings on the jam and casing. Porcelain tile.

Closeup shot – we were able to save this Anderson awning window with the resin trim work.

Bas-Relief accent tiles on this 8 inch tile tub surround with shelf unit and tile ceiling bonnet with a waterproof shower fan light combo and bronzed shower door system.

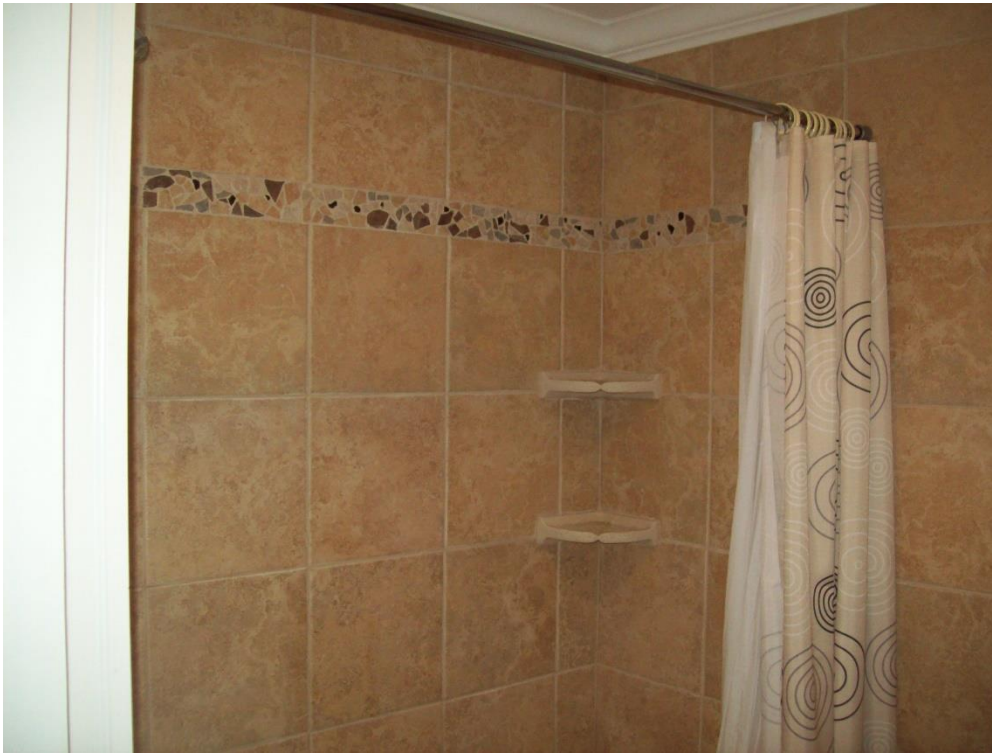

Listello tub surround with random accent tiles, Moen fixtures, 45 degree bull nose corner cuts, trays

This bath remodel also had a new tub** This is a 30 inch wide shampoo & bath product niche.

The surround itself was completed with a rounded brushed nickel shower curtain rod. Glass glazed ceramic tiles.

The last tub surround is really NOT a tub surround - It is a floor to ceiling tile installation throughout the entire bathroom that is wrapped up with a wide crown molding, listello accent and shelves. My wife and I bought this home, then took a trip to Eleuthera in the Bahamas and did this based on an AIRBNB that we stayed in on the islands. Floor to ceiling tile work cures bad paint jobs, said somebody once....In the Bahamas...I think.
