

KITCHENS

The center and heartbeat of most homes is the kitchen, and whether it's a summer home along the RI coastline in Bonnet Shores like this one, or Perdido Key in Pensacola, the concepts of functionality and durability matter most!

This is a Bonnet Shores home that had a large water loss in Narragansett, RI. The client used the insurance claim proceeds to make significant upgrades to the cabinets, including the large granite center island. The homeowner also wanted us to use a non-grouted stone backsplash. I have since done more projects with this product, especially on gas fireplace insert front face elevations.

We did this farmhouse kitchen with Cambria® Black Gunbarrel quartz countertops, a glass tile backsplash and black appliances. The new lighting fixtures and diamond floor tile installation make this kitchen pop.

Looking to avoid breaking the bank? If the cabinet boxes are solid, we often recommend and subsequently install American made and sourced Walzcraft cabinet doors and drawer faces instead of full replacement. Doors can be ordered primed and with cup hinges already routed for installation. These cabinets boxes, doors and drawer faces were refinished with superb quality INSL-X CabinetCoat® products, All 3500 Benjamin Moore colors are available for use with this particular INSL-X product line.

Then, the job was completed with under-cabinet lighting and a backsplash with inlays. The granite company in Pensacola included a free cutting board with their product. Nice!
